

### 19 March 2009 – Farm Weekly editorial

**To all our Woolorama Visitors,** Ferti-Tech would like to **thank you** all for taking the time to come over for a chat and to exchange ideas regards alternative and cost effective fertiliser solutions. Ferti-Tech staff and their Distributors Soil and Plant Solutions (SAPS), Gary Marsh, Brett Biglin appreciated the patronage over two days. We all came away excited considering the prospects ahead. A special thanks to Caen Taylor for his trial work and displays involving BioStim 22, Seed Enhancer, Microbe, Acid/Mineral fertiliser combinations. We are all greatly encouraged by the number of farmers that expressed an interest to trial alternatives on sections of their farm. This provides a perfect way to prove to yourself which applications are suited best for your soils and which will result in the most cost effective yields. Woolorama also presented an opportunity to meet Dr David Wallis, Ferti-Techs newly appointed Technical Director. David has several interesting R&D ideas to further enhance the current range and also to introduce several brand new products including high concentration single trace elements. Look out for upcoming Ferti-Tech seminars in your area which will include a section on the importance of understanding the needs of your soil. Contact us on [www.fertitech.com](http://www.fertitech.com) if you would like to find out the venues of upcoming seminars.
