Seed Enhancer Zn+™

Best Value High Analysis Zinc Nutrition Seed Coating

Seed Enhancer Zinc+™

The most cost effective and “smart start” fertiliser seed treatment available. Ferti-Seed Enhancer Zinc+ is an easy to use complete nutritional package that ensures fast germination and vigorous root and leaf growth for the first 4-6 weeks of life. Use Ferti-Seed Enhancer Zinc+ for soils that are deficient in Zinc and where you need to ensure maximum crop establishment as soon as possible. Roots will develop more laterals and hairs for faster nutrient exchange with the soil, leaves will develop and photosynthesize with more surface area sooner. All seeds need a guaranteed nutritional boost to make sure they germinate well and establish a strong root system for survival.

Seed Enhancer Zn+™ is the Most Cost Effective Fertiliser Treatment for Quick Germination and Vigorous Root Growth in the first 4-6 weeks

Recommended Coating Rate

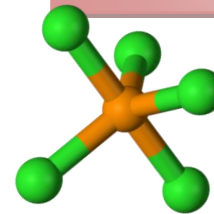

- Apply 5 litres per tonne of seed (cereals) 8-10 litres per tonne grass, canola, small seeds etc
- Refer to FTA for specific uses
- pH 1.4 SG 1.5 g/cm3.
- Caution – Corrosive and Acidic

Dilute for Easy Application

- Mix 1:1 up to 5 litres Fulvic Acid or 50/50 Fulvic Acid and Water
- Suitable for use with Other Seed Treatments, Pickles, Fungicides
- Suitable for use with Ferti-Tech 2Pak Trichoderma Seed Inoculum, for use against Rhizoctonia Pathogen

Enhancer Zn+™ % w/v

Enhancer Zn+™	% w/v
Phosphorus	12.4
Zinc	8.0
Manganese	3.2
Sulphur	2.15
Potassium	1.4
Magnesium	0.70
Copper	0.63
Boron	0.05
Molybdenum	0.08
Cobalt	0.015

Still Loaded with Phosphorus for Vigour & Strength

Seed Enhancer Zn+™ has High Levels of Phosphorus, Zinc, Potassium, Sulphur and Manganese

- **P** for strong root formation, growth, energy, yield set and resistance to pests and disease
- **Zn** for protein conversion, sugar build, hormone stimulation and optimal water holding status
- **K** for better leaf and stomata function, growth, enzyme and protein synthesis
- **S and Mn** for improved chlorophyll synthesis, element uptake and optimal seed formation

Use Seed Enhancer Zn+ to Maximise Early Growth and to Ensure Luxury Nutritional Levels.

Apply to Pasture Seed, Canola and Legumes for excellent Root Mass Results – with laterals!

Fully Compatible for use with all High Analysis Fertilisers including Ferti-Smart-N, Carbon Smart-N, MAP/DAP, SOA CalNitrate, Custom Formulations and Urea etc. Easy to Apply, using basic trickle flow and Auger Mixing Techniques. Dry in 15 minutes. Guaranteed to Always Work Well
