

PRODUCT SHEET

Ferti-Potassium Fulvate 8%

GENERAL INFORMATION

Ferti-Potassium Fulvate 8% is a liquid derived from sedge peat and is suitable for use in conjunction with most fertilisers and herbicides for foliar applications.

IMPORTANCE

Ferti-Potassium Fulvate 8% is a multiple action growth stimulant which can be applied with liquid fertilisers to plants during the growing season to quickly correct major and micro nutrient deficiencies. Scientific research has shown that fulvic acid boosts the response time by plants to fertiliser applications.

BENEFITS

- Increases the growth rates of plants
- Increases drought resistance and yields
- Stimulates plants own auxin production
- Acts as an anti-oxidant
- Detoxification of pollutants including pesticides

TYPICAL ANALYSIS

Elemental Analysis

Potassium Fulvate (*minimum*)

Potassium (K) (*as Phosphate*)

Phosphorus (P) (*as water soluble*)

Nitrogen (N) (*as organic matter*)

APPLICATION

Foliar: Mix Ferti-Potassium Fulvate 8% with liquid fertilisers 1 part to 200 parts water. Add concentrates to water. Do not mix concentrates together.

DIRECTIONS FOR USE

AGITATE DRUM WELL BEFORE USE

RISK: DO NOT Mix with other plant foods, pesticides, etc without prior testing for compatibility

AVAILABILITY Ferti-Potassium Fulvate 8% is available in 20 Lt Drums, 200 Lt Drums and 1000 Lt Shuttle.
