

## PRODUCT SHEET

# Ferti-Zinc

### “Foliar/Fertigation/Seed Dressing”

#### GENERAL INFORMATION

Ferti-Zinc is a soluble, high analysis concentrated liquid chelate. It is a known fact that nutritionally superior plants are most resistant to diseases/frost; therefore it is important to ensure that a good balanced nutritional plant is developed in the early phases of the crop. By applying the Ferti-Zinc product to the leaves or soil, rapid absorption of zinc is achieved.

#### IMPORTANCE

- Maintains CO<sub>2</sub> levels for photosynthesis
- Important role in the production of auxins necessary for moisture uptake by roots
- Improved seed set

#### TYPICAL ANALYSIS

Elemental Analysis	g/l	w/v %
Zinc (Zn)	161	16.1
Sulphate (S)	81	8.1
With added Potassium Fulvate		

#### APPLICATION

CROP	APPLICATION RATES	
	Rate/Ha	Water Ratio
<b>Foliar Treatment</b>		
Cereals, Canola, Cotton, Legumes, Maize, Rice	0.5-1.5L	Min of 50L
Horticulture and Viticulture	0.5-5L	Min of 200L
<b>Furrow Injection</b>		
Cereals, Maize, Cotton, Sorghum, Canola	1-4L	20L - 30L
<b>Seed Dressing</b>		
Cereals	4L	2-3L
Maize, Lupins	5L	2L
Sorghum	7L	4L
Canola	15L	10L

#### DIRECTIONS FOR USE

**AGITATE DRUM WELL BEFORE USE**

**RISK:** DO NOT Mix with other plant foods, pesticides, etc without prior testing for compatibility

**AVAILABILITY:** Ferti-Zinc is available in 20Lt, 200Lt and 1000Lt containers.
