Product Attributes; (All products)

- ✓ High percentage of **freely available silicate**
- ✓ Phosphorus in both a slow and quick release form
- ✓ Several natural forms of Potassium

- ✓ Contains Organic Carbon with high % humic acid
- ✓ Contains over 60 minerals as a compound fertiliser
- ✓ Does not acidify – **alkaline mineral compound**

Available in Bulka Bags, 25kg & 40kg Bags

General Conditions

1. Due to the nature of the mineral fertiliser there can be dust associated with the product and it may be necessary to keep vigilance on equipment where the build up of dust could affect equipment operations.
2. **PRICE PROTECTION** At order confirmation Western Mineral Fertiliser offers 100% price protection at no charge (product must be picked up within price list pricing period).
3. Payment of accounts is required prior to pick up.
4. It is the purchaser's responsibility to organise loading bookings for any product ordered.
5. Western Mineral Fertiliser reserves the right to close or change these offers (or parts of and or pricing) when target tonnages are met.
6. The purchaser accepts that the fertiliser requires special storage and handling.
7. Ownership of the product passes to the purchaser upon payment to Ferti-Tech Australia.
